

I-76 TO LEYDEN STREET NATURAL GAS REVITALIZATION PROJECT

INFORMATION SHEET
APRIL 2020
COLORADO

The map above is a graphic representation and may not show exact locations. Construction work areas are subject to additional refinement.

Project Overview

Xcel Energy is replacing up to 3 miles of 10-inch natural gas line in parts of Commerce City, Thornton, and Adams County, Colorado, known as the I-76 to Leyden Street Natural Gas Revitalization Project. This infrastructure replacement project is part of Xcel Energy's commitment to system revitalization, and ensures continued safe, reliable natural gas service to our customers.

The project is currently in the pre-design phase. Construction is scheduled to begin in late 2020 with completion in 2021. Please note that construction schedules are subject to change due to inclement weather or other factors. We will be installing the new natural gas line in the existing easements and public rights-of-way where feasible. Xcel Energy will work with applicable jurisdictions to meet all requirements.

Safety

Public safety is at the foundation of all we do. The safety of the public around Xcel Energy's natural gas system influences every decision we make when we construct and operate natural gas facilities.

The I-76 to Leyden Street Natural Gas Revitalization Project will be designed to meet federal, state, and Xcel Energy standards and safety requirements for installing, maintaining and operating natural gas infrastructure.

Xcel Energy COVID-19 Response

At Xcel Energy, we have a strong track record of preparing for emergencies, because our customers and our communities rely on us to power their homes and businesses and to keep the economy moving. The energy grid is a key part of the nation's critical infrastructure, so we have a responsibility to take a well-planned, heightened approach to the threats that coronavirus poses.

During project activities, our employees and subcontractors are taking precautions to limit exposure to themselves and others for the safety of the public and of our crews. We are requesting that members of the public not approach our workers in the field. This helps maintain social distance to keep everyone healthy and allows our workers to continue their critical work.
